This document provides you with key investor information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest. Capitalised terms not otherwise defined in this KIID, shall have the same meaning as in the Prospectus.

Aikya Global Emerging Markets Fund - UCITS (the "Fund"): S Share Class USD (Voting, Accumulating Shares)

(ISIN: IE00BMC3207). The Fund is managed by Mirabella Financial Services LLP (the "Investment Manager")

The Fund is a sub-fund of Pinnacle ICAV (the "ICAV")

INVESTMENT OBJECTIVE AND POLICY

Investment Objective:

- The Fund aims to achieve a total return in excess of the MSCI Emerging Markets Index (USD) (Ticker Code 891800) (the Index described further below).

Investment Policy:

- The Investment Manager is a fundamental, bottom-up investor which means that the Investment Manager commences its analysis at the level of individual companies that are being considered for inclusion in the Fund's portfolio.
- The Fund will aim to invest at least 70% of Net Asset Value in equity securities listed or traded in emerging markets or equity securities listed or traded on other markets whose business is predominantly based in emerging markets. The term "emerging markets" means markets that are considered emerging markets for the purposes of the Index.
- Diversification will be achieved through investments in securities of several countries or regions and sectors though there is no geographical focus other than seeking exposure to emerging markets as noted above.
- The Fund is actively managed but will be managed in reference to a

benchmark (being the Index) in that the Fund has a performance target to outperform the Index. The Investment Manager has discretion in its choices of investments within the objectives and policies of the Fund and is not constrained by reference to any benchmark index. The Fund's performance is measured against the MSCI Emerging Markets Index in USD. Benchmark details are provided for comparative purposes only.

Other Information:

- The Fund's investment policy is to invest in emerging markets and asset classes which may cause the Net Asset Value of the Fund to have a high volatility.
- Shares in the S Share Class USD are accumulating, voting shares. Accordingly, income and capital gains arising in respect of the share class will be re-invested and reflected in the Net Asset Value per Share of the Share Class.
- You can buy or sell shares on demand every Business Day in Ireland and London, United Kingdom subject to the terms set out in the section entitled Key Information for Purchasing and Repurchasing of the Fund's Supplement (which together with the prospectus constitutes the Prospectus).

Please see the sections entitled Investment Objective, Investment Policies and Investment Restrictions of the Prospectus where full details are disclosed.

RISK AND REWARD PROFILE

Lower risk

Higher risk

The indicator above illustrates the position of this Fund on a standard risk/reward category scale. Please note that:

- the risk reward indicator is based on historical data and may not be a reliable indication of the future risk profile of the Fund;
- the risk category shown is not guaranteed and may shift over time; and
- even the lowest category does not mean your investment is 'risk free'.

Due to the Fund's lack of operating history, this rating is based on the historical risk characteristics of another fund which employs the same investment strategy that will be implemented in this Fund and which is also managed by the Investment Manager. As this risk rating is not derived from the actual Fund, it may not reflect the Fund's actual risk level in the future.

The following risks are not adequately captured by the indicator:

- Operational Risk.** The Fund is exposed to the potential for loss caused by a deficiency in information, communications, transaction, processing and settlement, and accounting systems. The main risk is that third parties may fail to ensure that statutory requirements are met.
- Market Risk.** Investments in securities involve issuer, industry, market and general economic related risks. Adverse developments or perceived adverse developments in one or more of these areas could cause a substantial decline in the value of securities held by the Fund.
- Foreign Investment Risk** Investments in foreign companies may decline in value because of sovereign, political, economic or market instability; the absence of accurate information about the companies; risks of unfavourable government actions such as expropriation and nationalisation.
- Emerging Market Risk.** There are specific risks associated with investments in emerging markets, including political, settlement, credit, liquidity, currency, accounting standards, legal/regulatory and custodial/registration risk.
- China via Stock Connect Risk.** The Fund may seek exposure to stocks issued by companies listed on China stock exchanges via Stock Connect. Stock Connect is a trading programme that links the stock

markets in Shanghai and Hong Kong and may be subject to additional risk factors. Investors in Hong Kong and mainland China can trade and settle shares listed on the other market via the exchange and clearing house in their home market. Stock Connect is subject to quota limitations, which may restrict the Fund's ability to deal via Stock Connect on a timely basis. This may impact the Fund's ability to implement its investment strategy effectively.

- Currency Risk.** The Fund will be exposed to different currencies and changes in foreign exchange rates could create losses.
- Liquidity Risk.** Certain securities may be difficult or impossible to sell at the time and the price that the seller would like. The seller may have to lower the price to effect a secondary market sale, sell other securities instead or forego an investment opportunity, any of which could have a negative effect on fund management or performance.
- Investment Management Risk.** The discretionary management style applied to the Fund relies on anticipating various market developments and/or security selection. There is a risk that at any given time the Fund may not be invested in the highest performing markets or securities. The Fund's Net Asset Value may also decline.

Please see the section entitled Risk Factors of the Prospectus where full details of all of the risks of the Fund are disclosed.
